UMBA TECHNOLOGIES

COMPANY PROFILE · NOVEMBER 2026

Engineering the infrastructure behind African enterprise.

Cloud, AI, cybersecurity and enterprise hardware, built for Africa's power grids, networks and regulations. One accountable team from first design to 24/7 operation, from Kinshasa to Nairobi and Lagos to Johannesburg.

One partner for the entire stack

Umba /ˈuːm.ba/ *Swahili, verb*

TO CREATE · TO SHAPE · TO BUILD

True to its name, Umba exists to build. We are a technology services firm dedicated exclusively to the African market — and we understand the infrastructure constraints, regulatory landscapes, and growth ambitions of enterprises across the continent. We don't adapt solutions built elsewhere. We engineer them here.

> **The best technology for Africa should be built in Africa, by those who truly understand the landscape.**

200+	15+	98%	24/7
PROJECTS DELIVERED	AFRICAN COUNTRIES	CLIENT RETENTION	MANAGED SUPPORT

Africa-First

Engineered for the continent's connectivity, power, and regulatory realities.

Security-Led

Zero-trust principles baked into every engagement from day one.

Full-Stack

From hardware to AI platforms — one partner for your entire stack.

Long-Term

We invest in relationships, not transactions. Your growth is ours.

Fifteen services. One accountable partner.

01

Digital Business Solutions

Strategy, platforms and applications that modernise how your organisation works — from advisory to AI.

Consulting & Advisory
Technology strategy, architecture and roadmaps.

AI, Data & Analytics
Data platforms and applied AI that turn data into decisions.

Cloud & DevOps
Hybrid and public cloud with the pipelines to ship faster.

Software & Process Automation
Custom platforms, integrations and workflow automation.

02

Technology Solutions

The infrastructure layer: data centres, networks, communications, devices, security and power.

Data Centre & Servers
Server, storage and virtualisation infrastructure.

Unified Communications & VoIP
Voice, collaboration and contact-centre services.

Zero-Trust Cybersecurity
Security that assumes breach and trusts nothing by default.

Power & Solar
UPS, generators and solar backup for critical systems.

Enterprise Networking
Switching, routing, wireless and SD-WAN.

End-User Computing
Devices procured, imaged and managed at fleet scale.

Surveillance & Access Control
CCTV, access control and structured cabling.

03

Managed Services

We run it for you — monitored, supported and backed by service-level agreements.

Managed IT & Continuity
Fully managed IT operations with agreed service levels.

Monitoring & Control (NOC / SOC)
End-to-end monitoring of networks, systems and security.

Connectivity & Managed Links
Enterprise internet, redundant links and failover.

Backup & Disaster Recovery
Backup and recovery built around your recovery targets.

From first conversation to 24/7 operations

01

Assess

We study your environment, goals and constraints.

02

Design

A solution and plan you can review, cost and approve.

03

Deploy

Engineered, tested and documented to hand over cleanly.

04

Operate

Optional 24/7 management against agreed service levels.

HOW WE APPROACH EVERY ENGAGEMENT

Vendor-agnostic

We recommend what fits your needs, drawing on partnerships with 12 leading global vendors.

Built for local conditions

Designs that account for variable connectivity and intermittent power.

Accountable end-to-end

One partner from first design to 24/7 operation, backed by agreed service levels.

WHY UMBA

Better performance, higher productivity

Reliable systems and networks keep your teams working, not waiting.

Reduced operating costs

Right-sized infrastructure and managed operations lower the cost of running IT.

Scales as you grow

Add capacity, sites and users without redesigning your environment.

Service levels you can count on

SLA-backed support and 24/7 monitoring behind the systems that matter most.

Proof, in production

CASE STUDIES

SOFTWARE & AUTOMATION · MONSOON TRADING

Fuel distribution, fully digital

A system that records every truck fuel collection took Monsoon Trading's entire distribution process off paper and cut fuel theft to zero.

0
FUEL THEFT

100%
PROCESS DIGITISED

ENTERPRISE HARDWARE · GROUPE LEDYA

Equipping a group, on a deadline

Large hardware orders sourced for Groupe Ledya's companies and delivered within a short timeframe.
